Chronic lymphocytic leukemia (CLL) is the most common leukemia diagnosed in adults. What sets CLL apart from other leukemia types include where it starts and how fast it usually grows.

How CLL Is Different From Other Types of Leukemia
Leukemia requires expert care. Know your options. Leukemia is the 10th most common cancer diagnosed in the United States. But leukemia isn't just one disease—many types of leukemia originate in different parts of the bloodstream and affect

different types of blood cells. Also, some leukemias are regarded as acute, meaning they may require aggressive treatments.

Leukemia - Cancer Treatment
Centers of America

Leukemia is a cancer of early blood-forming cells, most frequently of the white blood cells although some leukemias begin on other blood cell types. Leukemia can be described as fast-growing (acute) or slow growing (chronic). The different types of leukemia have varied outlooks and treatment options.
