His Keyline principles or concepts (Keyline Design) have been adopted by farm owners in almost every country in the world. Yeomans' Keyline concepts are now part of the curriculum of many sustainable agriculture courses in colleges and universities across the world. His ideas have also been a key factor in the development of permaculture design. P.A. Yeomans wrote four books: The Keyline Plan, The Challenge of Landscape, Water For Every Farm and The City Forest. [P. A. Yeomans - Wikipedia](#)

Yeomans described a system of amplified contour ripping to control rainfall runoff and enable fast flood irrigation of undulating land without the need for terracing it. Keyline designs include irrigation dams equipped with through-the-wall lockpipe systems, gravity feed irrigation, stock water, and yard water. Graded earthen channels may be interlinked to broaden the catchment areas of high dams, conserve the height of water, and transfer rainfall runoff into the most efficient high dam sites.

Water for Every Farm - Yeomans Keyline Plan. Compiled, updated and edited by Ken B. Yeomans H.D.A. from work and writings of, his father, the late P.A. Yeomans A. Keyline planning based on permanence. 'Keyline' plans the development of the replacement landscape on the two most permanent features of the natural landscape: (1) The climate, which in large measure has moulded and determined its present topography and, (2) The existing shape and form of the land with the underlying influence of ...
